Why Choose Norwex Microfiber? At only 1/200th the size of a strand of human hair, Norwex Microfiber is one of the most innovative products in the cleaning industry today. Unlike cotton cloths that will simply spread the dirt, grease and other particles around, Norwex BacLock™ Microfiber lifts these particles up into the cloth and away from the surface. Once inside the cloth, the Norwex MicroSilver in the cloth goes to work with self-purification properties against mold, fungi and bacterial odor within 24 hours, so that it is ready to use again. Norwex Microfiber products are so effective that you can use them to clean and disinfect with only WATER!

Norwex is all about reducing chemicals in your home. Top Sellers:

Envirocloth - all purpose cleaning cloth. Use dry to dust, wet to clean!

Window Cloth - clean and polish your windows and mirrors streak-free using only water!

Dusting Mitt - works by static and makes it easy to dust nooks and crannies. No furniture polish needed!
